### Read This Manual

Inside you'll find many helpful hints on how to use and maintain your air conditioner properly. Just a little preventive care on your part can save you a great deal of time and money over the life of your air conditioner. You'll find many answers to common problems in the troubleshooting tips - you should be able to fix most of them quickly before calling service. These instructions may not cover every possible condition of use, so common sense and attention to safety is required when installing, operating and maintaining this product maintaining this product.

### CAUTION

- This appliance is not intended for use by people (including children) with reduced physical, sensory or mental capabilities or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- · Children should be supervised to ensure that they do not play with the air condi
- · The appliance shall be installed in accordance with national wiring regulations. Do not operate your air conditioner in a humid room such as a bathroom or laundry room.

## **Safety Precautions**

To prevent injury to the user or other people and property damage, the instructions shown here must be followed. Incorrect operation due to ignoring of instructions may cause harm or damage. The level of risk is shown by the following indications.

This symbol indicates a hazardous situation which, if not avoided, could result in death or serious injury.

This symbol indicates a hazardous situation, which, if not avoided could could in the first symbol indicates a hazardous situation, which, if not avoided could could be a first symbol.

# NOTICE This symbol addresses practices not related to physical injury.

WARNING

- Plug in power cord plug properly.
   Otherwise, it may cause electric shock or fire due to excess heat generation.
- Do not modify power cord length or share the outlet with other appliances as it may cause electric shock or fire due to overheating.
   Always ensure effective grounding.
   Incorrect grounding may cause electric shock.
- Unplug the unit if you notice unusual sounds or smells, or smoke comes from it. A damaged product may cause fire and electric shock.
- Keep firearms away from the unit.
- late room before operating the air conditioner if there is a gas leakage from
- anomer appliance.

  Do not operate or stop the unit by inserting or pulling out the power cord plug.

  Do not operate with wet hands or in very humid enviroments.

  It may cause electric shock.

  Do not allow water to come into contact with any electric parts.

  It may cause failure or electric shock.

  Do not use the socket if it is loose or damaged.

- It may cause fire and electric shock.
- Do not place the power cord close to heating appliances.
   It may cause fire and electric shock
- Do not disassemble or modify unit.
- It may cause failure and electric shock.
  Do not disassemble or modify unit.
  It may cause failure and electric shock.

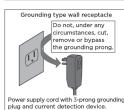

- Do not damage or use an alternate power cord.
   It may cause fire and electric shock.
   If the power cord is damaged, it must be replaced by the manufacturer or an authorized service center or a similarly qualified person in order to avoid a hazard.
- · Do not direct airflow straight into persons to avoid possible health hazard.
- Do not open the unit during operation.
   It may cause electric shock.
- Do not use the power cord near flammable gas or combustibles, such as gasoline, benzene, thinner, etc. It may cause an explosion or fire.
- Do not let children hang on the air conditioner or bracket.
- A serious injury may occur. Avoid fire hazard or electric shock. Do not use an extension cord or an adaptor plug. Do not remove any prongs from the power cord.
- Be sure the air conditioner is properly grounded. To minimize shock and fire hazards, proper grounding is important. The power cord is equipped with a three-prong grounding plug for protection against shock hazards.
- Your air conditioner must be used in a properly grounded wall receptacle. If the wall receptacle you intend to use is not adequately grounded or protected by a time delay fuse or circuit breaker, have a qualified electrician install the proper receptacle. Ensure the receptacle is accessible after the unit installation.
- Be sure the electrical service is adequate for the model you have chosen. This
  information can be found on the serial plate, which is located on the side of the cabinet and behind the grille.
- · Do not drink water drained from the air conditioner.

## A CAUTION

- When the air filter is to be removed, do not touch the metal parts of the unit. It may cause injury.
- When the unit needs cleaning, switch off, and turn off the circuit breaker.
  Do not clean unit when power is on as it may cause fire, electric shock or injury.
  Do not place obstacles around air inlets or inside of air outlet.
- It may cause failure or accident.
- · Clean with a soft cloth only. Do not use strong detergents that contain wax or thinners as it may damage the product.
- Use caution when unpacking and installing. Sharp edges could cause injury.
- · Do not clean the air conditioner with water. Water may enter the unit and degrade the insulation which could lead to electric
- Do not put a pet or house plant where it will be exposed to direct air flow
- This could injure the pet or harm the plant. Hold the plug by the head of the power plug when taking it out.
   Otherwise, it may cause electric shock and damage.
- Ensure that the installation is properly secured to prevent the product from potentially
- Do not place heavy objects on the power cord and ensure that the cord is not compressed. Otherwise, there is danger of fire or electric shock.
- · If water is spilled on the unit, turn off the unit and switch off the circuit breaker.
- supply by taking the power-plug out and contact a qualified se
- Do not use near gas stove or other gas burning appliances, as air flow may affect gas
- Do not use for any purpose other than room comfort.
   Do not use this air conditioner to preserve precision devices, food, pets, plants, and art objects. It may cause deterioration.
- Turn off the main power switch if the unit is not to be used for an extended time
- · Always insert the filters securely. Clean filter once every two weeks. Operation without filters may cause failure.

## Operation of Current Device

## The power supply cord contains a current device that senses damage to the pow cord. Test your power supply cord as

- Plug in the air co
- The power supply cord will have TWO buttons on the plug head. Press the TEST button. You will notice a click as the RESET button pops out.
- 3. Press the RESET Button. You will notice a click as the button engages.
- The power supply cord is now supplying electricity to the unit. (On ne products this is also indicated by a light on the plug head.)

# NOTICE

The power supply cord with this air conditioner contains a current detection device designed to reduce the risk of fire

In the event that the power supply cord is damaged, it can not be repaired. It must be replaced with a cord from the manufacturer.

## NOTICE

- Do not use this device to turn the unit on or off
- Always make sure the RESET button is pushed in for correct operation.
- The power supply must be replaced if it fails to reset when either the TEST button is pushed, or it can not be reset. Please contact a Service Center.

## EXPLANATION OF SYMBOLS DISPLAYED ON THE UNIT

	WARNING	This symbol shows that this appliance used a flammable refrigerant. If the refrigerant is leaked and exposed to an external ignition source, there is a risk of fire.
	CAUTION	This symbol shows that the operation manual should be read carefully.
	CAUTION	This symbol shows that a service personnel should be handling this equipment with reference to the installation manual.
(li	CAUTION	This symbol shows that information is available such as the operating manual or installation manual.

# Midea

User Manual

Before using this product, please read this manual carefully and keep it for future reference. The design and specifications are subject to change without prior notice for product improvement.

## Window Type

MAW\_SERIES

804106454

- Do not try to accelerate the defrosting process or methods of cleaning that are not recommended by the manufacturer.
- The appliance shall be stored in a room without a continuously operating ignition source (for example, open flames or an operating gas appliance) or an ignition source (for example, an operating electric heater) close to the appliance. The appliance shall also be stored in a room without ignition sources.
- Be aware that the refrigerants may not contain an odor.

MARNING (for using R32 refrigerant only)

- be aware that the reingerants may not contain an odor.

  Keep ventilation openings clear of obstruction.

  Flammable refrigerant R32 is used within air conditioner. Please follow the instructions carefully to handle, install, clean, and service the air conditioner to avoid damage or hazard. Do not dispose of air conditioner in regular trash. Contact qualified agency for proper disposal.
- No open fire or devices that generate spark/arcing shall be around the air conditioner to avoid causing ignition of the flammable refrigerant used. Please follow the instructions carefully to store or maintain the air conditioner to prevent mechanical damage from occurring.

MPORTANT NOTE:Read this manual carefully before installing or operating your new air conditioning unit. Make sure to save this manual for future reference.

## Operating Instructions

Trickling Sound Droplets of water hitting condenser during normal operation may cause a trickling sound.

## Vibration

Unit may vibrate and make noise because of poor wall or windor construction or incorrect installation.

# Models with High Pitched Sound Sound of Rushing Air Move arrow to point to In front of the unit, you rushing air being moved by the fan Gurgle/Hiss Gurgling or hissing noises may be heard due to refrigerant flowing through evaporator during normal operation.

Trickling Sound Droplets of water hitting condenser during normal operation may cause a trickling sound.

# Vibration

Unit may vibrate and make noise because of poor wall or window construction or incorrect installation

## NOTICE

All the pictures in this manual are for illustrative purposes only. The actual appearance of the air conditioner you purchased may vary slightly, but its operation and functions will be similar.

## Air Conditioner Operation

d to be operated under the following conditions

The an editation is addigned to be operated under the following conditions.		
Cooling Operation	Outdoor temp.: 64-109°F/18-43°C	
	Indoor temp.: 62-90°F/17-32°C	
Heating Operation	Outdoor temp.: 23-76°F/-5-24°C	
neating Operation	Indoor temp.: 32-80°F/0-27°C	

# **▲** WARNING

NOTE

To reduce the risk of fire, electrical shock, personal injury or property, read the SAFETY PRECAUTIONS before operating this appli

Always wait 3 minutes when turning the unit off and then on again,or when changing from cool to fan and back to cool. This prevents compressor from overheating and possible tripping. TO BEGIN OPERATING THE AIR CONDITIONER, FOLLOW THESE STEPS:

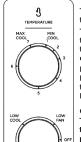

Set the temperature to the coldest setting

- Adjust the louver for comfortable air flow (see Air Directional Louvers). Once the room feels cool, adjust to the temperature you find most com
- 5. Make sure that the air flow inside and outside are not obstructed by anything.
- NOTICE The relative humidity of room should be less than 80%. If the unit is used in a condition with a relative humidity over 80%, there will be condensed water on the surface of the unit.
- Performance may be reduced outside of these operating temperatures Before you begin, thoroughly familiarize yourself with the control panel as shown below and all its functions, then follow the symbol for the functions you desire. The

unit can be controlled by the unit control panel alone or with the remote control

# Air Conditioner Features - Models without remote

The controls featured in this manual are representative of many available models. Your model's features and appearance may vary slightly.

THERMOSTAT The thermostat is used to set the desired room temperature when

the unit is being operated in the COOL MODE. To set the desired room temperature, rotate the thermostat switch to the desired setting. After the set temperature is achieved the thermostat will automatically start and stop the compressor in order to maintain the desired set temperature.

Rotate the thermostat selector clockwise for higher cool settings. Higher cool settings will provide lower room temperature. Rotate the thermostat selector counter clockwise for lower cool settings. Lower cool settings will provide higher room temperature.

## COOL MODE

The desired cool setting is selected by rotating the knob clockwise to the desired position.

## High Cool has maximum cooling effect and airflow. Low Cool has minimum cooling effect and airflow.

## FAN MODE

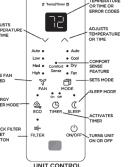

Rotate the knob counter clockwise to select your choice of fan speeds for air circulation

## UNIT CONTROL

When selecting a fan speed, the compressor will not run

## Air Conditioner Features - Models with remote **ELECTRONIC CONTROL OPERATING INSTRUCTIONS**

Before you begin, thoroughly familiarize yourself with the control panel as shown below and all its functions, then follow the symbol for the functions you desire. The unit can be controlled by the unit control alone or with the remote controller.

TO TURN UNIT ON OR OFF: NOTICE The unit will automatically initiate the Energy Saver function under Cool, Dry Auto (only Auto-Cooling and Auto-Fan)

TO CHANGE TEMPERATURE SETTING: ess Power button to turn unit on or off NOTICE

Press or hold either UP/DOWN button until the desired temperature is seen on the display. This temperature will be automatically and 86°F (30°C). If you want to display the actual room temperature, see To Operate on Fan Only section.

TO ADJUST FAN SPEEDS: Press to select the Fan Speed in four steps-Auto, Low, Med or High. Each time the button is pressed, the fan speed mode is changed. On Dry mode, the fan operates on Low speed

Press Sleep button to initiate the sleep mode. In this mode the selected erature will increase by 2°F/1 s selected. The temperature will then increase by another 2°F/1 (or 2)°C after an additional 30 minutes. This new temper will be maintained for 6 hours before it returns to the originally selected temperature. The Sleep mode program can be cancelled at any time during operation by pressing the Sleep button again.

## CHECK FILTER FEATURE: The Check Filter feature is a reminder to clean the air filter for a more efficient pperation. The light will illuminate after 250 nours of operation. After cleaning the filter press the Filter button to reset the Check Filter function turning the light off.

ENERGY SAVER FEATURE: Press Energy Saver button to initiate this function. This function is available on COOL, DRY, AUTO (only AUTO-COOLING and AUTO-FAN) modes. The fan will continue to run for 3 minutes after the compressor shuts off. The fan then cycles on for 2 minutes at 10 minute intervals until

the room temperature is above the set temperature, at which tin the compressor turns back on and Cooling

COMFORTSENSE FEATURE: The ComfortSense function enables the remote control to measure the temperature at its current location. When using AUTO, COOL, or HEAT functions, measuring ambient temperature from the remote control (instead of from the indoor unit itself) will enable the air conditioner to optimize the temperature around you and ensure maximum comfort.

This feature can be activated from the remote control ONLY.

control ONLY.
The remote control will send this signal to the air conditioner every 3 minutes interval until press the ComfortSense button again.If the unit does not receive the ComfortSense signal during any 7 minutes interval, the unit will beep to indicate the ComfortSense mode has ended. TO SELECT THE OPERATING MODE:

To choose the operating mode, press the Mode button the unit cycles through the modes, Auto Cool, Dry, and Fan. The adjacent indicator light ain on once the mode is selected. The unit will automatically initiate the Energy Saver function under Cool, Dry, Auto (only Auto-Cooling and Auto-Fan) modes

- To operate on Auto mode: The fan speed is automatically controlled based on the temperature setting and room temperature and cannot be adjusted.
- The air conditioner will control room temperature automatically according to the temperature you've set.
- In this mode, the fan speed cannot be adjusted, as it's automatically controlled according to the temperature setting and room temperature.

To operate on Fan Only:

- Use this function only when cooling is not desired, such as for room air circulation or to exhaust stale air (on some models). (Remember to open the vent during this function, but keep it closed during cooling for maximum cooling efficiency.) You can choose any fan speed you prefer.
- In Fan Only mode, the temperature is not adjusted.

## To operate on Dry mode:

In this mode, the air conditioner will generally function as a dehumidifier. Since the onditioned space is a closed or sealed area, ome degree of cooling will occur.

- When the unit is on or off, first press the illuminates indicating the Auto Start program has initiated.
- When the time of TIMER ON is displayed, press the Timer button again. The TIMER OFF ndicator light illuminates. It indicates the Auto Stop program has initiated
- Press or hold the UP or DOWN button to change the Auto time by 0.5 hour increments, up to 10 hours, th at 1 hour increments up to 24 hours. The control will count down the time remaining until start.
- 5 seconds, and the system will auton revert back to display the previous temperature setting or room temperature when the unit is on. (when the unit is off,
- ng the timer setting to 0.0 will cancel the Auto Start/Stop timed program If setting ON 0.5 and OFF 1 at the same time,

Shows the set temperature in "°C" or "° F" and the Auto-timer settings. While on Fan Only mode, it shows the room

NOTE: In Fan Only mode, it will display "LO" or "HI." ES - Evaporator temperature sensor error - Unplug the unit and plug it back in. If

AS - Room temperature sensor error -Unplug the unit and plug it back in.

error repeats, call for service. NOTICE If the unit shuts off unexpectedly due to the power outage, it will restart with the previous function setting automatically when the power resumes.

## Additional Information

Now that you understand the operating procedure, here are more features in your control that you should become familiar with.

- The Cool circuit has an automatic 3 minute time delayed start if the unit is turned off and on quickly. This prevents overheating of the compressor and possible circuit breaker tripping. The fan will continue to run during this time.
- The control can display temperature in Fahrenheit or Celsius. To convert from one to the other, press and hold the UP/DOWN Temp/Timer buttons at the same time, for 3

The louvers will allow you to direct the air flow Up or Down and Left or Right throughout the

room as needed. Pivot horizontal louvers until the desired Up/ Down direction is obtained. Move the Lever(s) from side to side until the desired Left/Right

- The selected time will register in
- Turning the unit ON or OFF at any time or

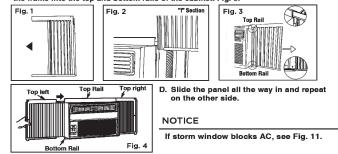

Error codes:

## 3. INSTALL THE ACCORDION PANELS

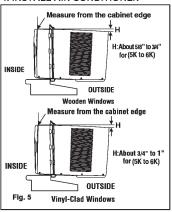

## NOTICE

The Top rail and Sliding Panels on each side are offset to provide the proper pitch to the rear of 5/16" (8mm). This is necessary for proper condensate management and drainage. If you are not using the side panels for any reason, this pitch to the rear must be maintained.

- Place unit on the floor, a bench or a table. There is a left and right side accordion panel; be sure to use the proper panel for each side. When installed, the flange for securing the panel in place to the window sill will be facing into the room.
  - A. Hold the side panel in one hand and gently pull back the center to free the open end. See
  - B. Slide the free and "I" section of the panel directly into the cabinet as shown in Fig. 2. Slide the panel down. Be sure to leave enough space to slip the top and bottom of the frame into the rails on the cabinet.
  - C. Once the panel has been installed on the side of the cabinet, make sure it sits securely inside the frame channel by making slight adjustments. Slide the top and bottom ends of the frame into the top and bottom rails of the cabinet. Fig. 3.

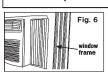

## 4. INSTALL AIR CONDITIONER

2. While keeping a firm grip on the air conditioner, carefully place the unit into the window opening so the bottom of the air conditioner frame is against the window sill (Fig. 5). Carefully close the window behind the top rail of the unit.

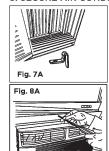

## NOTICE

Check that air conditioner is tilted back per dimension H (Fig. 5) (tilted about 3° to 4° downward to the outside). After proper installation, condensate should not drain from the overflow drain hole during normal use. Adjust the slope if otherwise.

3. Extend the side panels out against the window frame (Fig. 6).

## 5. SECURE AIR CONDITIONER

A. Place the frame lock between the frame extensions and the window sill as shown (Fig. 7A for Wooden windows).

Drive 3/4" (19 mm) or 1/2" (12.7 mm) locking screws through the frame lock and into the sill.

NOTE: To prevent window sill from splitting, drill 1/8" (3 mm) pilot holes before driving screws.

B1: For wooden windows:

Drive 1/2" (12.7 mm) locking screws through the frame lock and into the sill (Fig. 8A).

NOTE: To prevent window sill from splitting, drill 1/8" (3mm) pilot holes before driving screws. Drive 1/2" (12.7mm) locking screws through frame holes into window sash (Fig. 8B).

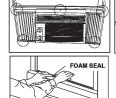

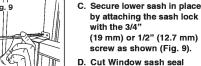

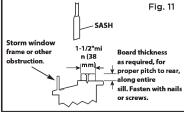

Fig. 8B

D. Cut Window sash seal foam and insert it in the space between the upper and lower sashes (Fig. 10).

# If AC is Blocked by Storm Window

Add wood as shown in Fig. 11, or remove storm window before air conditioner is

If storm window frame must remain, be sure the drain holes or slots are not caulked or painted shut. Accumulated rain water or condensation must be allowed to drain out.

# Removing AC From Window

- Turn AC off, and disconnect power cord.
- Remove sash seal from between windows, and unscrew sash lock Remove screws installed through top rail and side panel frames
- Close (slide) the side panels into the rails.
- Keeping a firm grip on the air conditioner, raise the sash and carefully remove.
- Be careful not to spill any condensate while lifting unit form window. Store parts WITH air conditioner.

# **Care and Cleaning**

Clean your air conditioner occasionally to keep it looking new. Be sure to unplug the unit before cleaning to prevent shock or fire hazards.

## Air Filter Cleaning

The air filter should be checked at least once a month to see if cleaning is necessary. Trapped particles in the filter can build up and cause an accumulation of frost on the cooling coils.

- Push the vent handle to the closed position (where applicable). Open the front panel.
- Take the filter by the center and pull up and out.
- Wash the filter using liquid dishwashing detergent and warm water. Rinse filter thoroughly. Gently shake excess water from the filter. Be sure the filter is thoroughly dry before replacing.
- You may also vacuum the filter clean rather than washing.

## NOTICE

Never use hot water over 104°F (40°C) to clean the air filter. Never attempt to operate the unit without the air filter.

## **Cabinet Cleaning**

- Be sure to unplug the air conditioner to prevent shock or fire hazard. The cabinet and front may be dusted with an oil-free cloth or washed with a cloth dampened in a solution of warm water and mild liquid dishwashing detergent. Rinse thoroughly and wipe dry. Never use harsh cleansers, wax or polish on the cabinet front.
- Be sure to wring excess water from the cloth before wiping around the controls. Excess water in or around the controls may cause damage to the air conditioner.
- Plug in air conditioner.

# Winter Storage

If you plan to store the air conditioner during the winter, remove it carefully from the window according to the installation instructions. Cover it with plastic  $\cdot$ 

## **Troubleshooting Tips**

Before calling for service, review this list.

Problem Wall plug disconnected. Push plug fi rmly into wall outlet. Circuit breaker tripped. Reset circuit breaker. Check if the light on the plug is on. If it is off, press the RESET button. Air conditioner Power is OFF. Turn power ON. Unit turned off and then on quickly. Turn unit off and wait 3 minutes Room temperature below 62°F (17°C). Cooling may not occur until

room temperature rises above 62°F (17°C). Temperature sensor behind the air fi Iter is touching the cold coil. Try to move it so it does not contact the cold coil.

LOCATION OF THE REMOTE CONTROLLER

Use the remote controller within a distance of 16.4 ft or 26.2 ft (5 or 8 meters depending on the model) from the air conditioner, pointing it towards the receiver. Reception is confirmed by a beep

# CAUTION

- The air conditioner will not operate if curtains, doors or other materials block the signals from the remote controller to the
- Prevent any liquid from spilling onto the remote controller. Do not expose the remote controller to direct sunlight or
- · If the infrared signal receiver on the indoor unit is exposed to direct sunlight, the air conditioner may not function properly.
- Use curtains to prevent the sunlight from falling on the · If other electrical appliances react to the remote controller,
- either move these appliances or consult your local dealer.
- Button design is based on typical model and may vary slightly from the actual one you purchased
- All the functions described are accomplished by the unit. If the unit is without a feature, the unit will not respond if the corresponding button on the remote is
- When there are significant differences between features or operation implied by the remote control illustration and the actual functions described in the USER'S MANUAL, the descriptions in the USER'S MANUAL shall prevail.

(Batteries not supplied)

## REFURBISHED PRODUCT **LIMITED THIRTY DAY** WARRANTY

The Refurbished Product Service **Center** offers the following WARRANTY to the ORIGINAL purchaser of a product which we have refurbished.

This product that has been refurbished is warranted against any electronic or mechanical defects for a period of THIR-TY DAYS from the date of the original purchase by the consumer. Since this unit was sold as a refurbished item, the warranty does not apply to any cosmetic appearance items such as scratches Should a defect occur, the Refurbished Product Service Center will repair or, at its option, replace defective unit/parts with new or rebuilt materials without charge for either parts or labor. Replacement unit/parts will be warranted for the remaining portion of the original warranty

This warranty does not cover installation or damage from accident, misuse, abuse, improper wiring, incorrect voltage, operating the unit against the instructions in the owner's manual or any product which has been opened, altered, or tampered

This warranty does not cover costs for removal and or installation of the unit for repair. Under no circumstances shall the service center be liable for any special, incidental or consequential damages or for any other expenses incurred by reason of use or sale of this product. This warranty is in lieu of any other warranties expressed or implied warranty of merchantability of fitness for particular use or otherwise.

This warranty gives the consumer specific legal rights and they may also have other rights which vary from State to State. Some States do not follow the exclusion or limitation of incidental or consequential damages, hence the above exclusion and limitations may not apply.

Refurbished Product Service Center 13225 Marquardt Avenue Santa Fe Springs, CA 90670

## **WARRANTY REPAIR** INFORMATION

If you need service on your unit during the 30 day warranty period; please go

www.ConsumerServiceRefurbish.com or call the Refurbished Product Service Center at 562-946-3531 to obtain the required claim number. Once you obtain your claim number, pack the unit properly (the original carton is ideal for this purpose) along with a copy of your purchase receipt. Send the unit freight prepaid and in-
