## **SONY** Home Theatre System

Please read this manual carefully before operating your unit and retain for future reference.

804106640

### WARNING

Do not install the speaker system in a confined space, such as a bookcase or built-in cabinet.

To reduce the risk of fire, do not cover the ventilation opening of the speaker system with newspapers, tablecloths,

curtains, etc.
Do not expose the speaker system to naked flame sources (for example, lighted candles).

To reduce the risk of fire or electric shock, do not expose this speaker system to dripping or splashing, and do not place objects filled with liquids, such as vases, on the speaker system.

The speaker system is not disconnected from the mains as long as it is connected to the AC outlet, even if the speaker system itself has been turned off.

As the mains plug is used to disconnect the speaker system from the mains, connect the speaker system to an easily accessible AC outlet. Should you notice an abnormality in the speaker system, disconnect the mains plug from the AC outlet immediately.

## CAUTION

Risk of explosion if the battery is replaced by an incorrect type.
Do not expose batteries or applianc with battery-installed to excessive h such as sunshine and fire.

### Do not place this product close to medical devices

to medical devices. This product (including accessories) has magnet(s) which may interfere with pacemakers, programmable shunt valves for hydrocephalus treatment, or other medical devices. Do not place this

product close to persons who use such medical devices. Consult your doctor before using this product if you use any such medical device.

## Recommended cables

Properly shielded and grounded cables and connectors must be used for connection to host computers and/or For the bar speaker and surround

The nameplates are located on the bottom of the bar speaker and surround

This equipment has been tested and found to comply with the limits set out in the EMC regulation using a connection cable shorter than 3 meters.

### **Connecting Sony TV with** the BLUETOOTH Function Wirelessly

When using Sony TV\* with the BLUETOOTH function, you can listen to sound of the TV or device that is connected to the TV by connecting the speaker system and TV wirelessly.

The TV needs to be compatible with A2DF (Advanced Audio Distribution Profile) of the BLUETOOTH profile.

f connecting the speaker system and TV by ssing the BLUETOOTH function, you cannot display the USB playback screen on the TV

use all the functions of the speaker system, connect the speaker system and TV with an HDMI cable. For details about connections and operations to listen to TV sound by connecting with an HDMI cable, efer to Startup Guide (separate focument)

## Listening to TV Sound by Connecting the Speaker System and TV Wirelessly

You need to perform pairing of the speaker system and TV by using the BLUETOOTH function. Pairing is the process required to mutually register the information on BLUETOOTH devices to be connected wirelessly in advance.

Turn on the TV.

Turn on the speaker system.

Press and hold the BLUETOOTH INPUT on the remote control simultaneously for 5 seconds The speaker system enters the pairing mode, [PAIRING] appears in the front panel display, and the BLUETOOTH indicator flashes twice in blue repeatedly.

On the TV, search the speaker system by performing the pairing

The list of the BLUETOOTH devices that are searched appears on the TV For the operation method to pair the BLUETOOTH device to the TV, refer to the operating instructions of the

Pair the speaker system and TV by selecting "HT-S40R" from the list on the TV screen. Make sure that the BLUETOOTH

wrate sure that the BLUETOOTH indicator on the subwoofer lights in blue and [TV-BT] appears in the front panel display.

A connection between the speaker system and TV has been established.

Select the program or input of the device by using the TV remote control. The sound of the displayed image on the TV screen is output from the speaker system. Adjust the volume of the speaker system by using the TV remote 8

control. When pressing the muting button on the TV remote control, the sound is muted temporarily.

If the IV sound is not output from the speaker system, select the TV input by pressing INPUT and check the status of the front panel display and indicators on

the subwoofer.
- [TV-BT] appears in the front panel display: The speaker system and TV are connected and TV sound is output from the speaker system. the speaker system.
The BLUETOOTH indicator flashes twice repeatedly and [PAIRING] appears in the front panel display: Perform pairing on

the TV.
[TV] appears in the front panel display:
Perform steps from the start.

Perform steps from the slart.

When you connect the speaker system and TV with an HDMI cable, the BLUETOOTH connection is canceled. To connect the speaker system and TV with the BLUETOOTH function again, disconnect the HDMI cable, then perform the connecting operation from the slart. While the speaker system is connecting the TV with the BLUETOOTH function and [AUTO SOUND] is selected for the sound mode, [STANDARD] is selected for the sound mode.

## Listening to Sound of the

You can turn the speaker system on/off, adjust the volume, and mute the sound by using the TV remote control when connecting the TV to the speaker system

1 Turn on the TV with the TV remote

The speaker system is turned on by interlocking with the TV power, and TV sound is output from the speaker system. 2 Select the program or input of the

The sound of the displayed image

on the TV screen is output from the speaker system. Adjust the volume of the speaker system by using the TV remote

control.

When pressing the muting button on the TV remote control, the sound is muted temporarily.

If you select the input other than [TV] on the remote control supplied with the speaker system, the TV sound is not output from the speaker system. To output the TV sound, select the TV input by pressing INPUT.

**Tip**When the TV is turned off, the speaker system is also turned off by interlockin with the TV power.

## Listening to Music/Sound Listening to a TV

## Press INPUT repeatedly to select [TV] in the front panel display.

Adjust the volume.

• Adjust the volume by pressing 

• When you connect the TV to both the HDMI OUT (TV (ARC)) and TV IN (OPTICAL) jacks, the jack for audio input is selected depending on which audio signal is input first.

tirst.
When the input source does not contain
much bass sound, such as in TV programs,
the bass sound from the subwoofer may
be difficult to hear. You can also select the input by pressing
on the subwoofer.

## Listening to Music on a USB Device

Notes)

To view the USB content list on the TV screen, make sure you connect the speaker system to the TV using an HDMI cable (not supplied).

Change the input of the TV to the input to which the speaker system is connected.

1 Connect the USB device to the  $\psi$  (USB) port.

Press INPUT repeatedly to select [USB] in the front panel display. [READ] appears in the front panel display and the speaker system starts reading data of the USB device. When the reading of data is completed, the USB content list appears on the TV screen.

Press \*/\* to select the content you want, then press ENTER.

The selected content starts playing. You can go to the upper layer by pressing BACK.

Adjust the volume.

• Adjust the volume by pressing

— +/-.

When the input source does not contain much bass sound, such as in TV programs, the bass sound from the subwoofer may be difficult to hear. To select the play mode You can select the play mode for USB playback, such as repeat play or rando play, from the setting menu.

1 Press MENU. [CURRENT STATUS] appears in the front panel display.

Press \*/\*/ENTER to select [USB] [REPEAT].

### Using the Speaker System by Interlocking with a TV

### Operating the Speaker System by Interlocking with a TV (Control for HDMI function)

Connecting a TV compatible with the Control for HDMI function using an HDM cable enables you to interlock the speaker system operation such as powe on/off or volume adjustment with a TV.

### About the Control for HDMI function

function
The Control for HDMI function is a
function that enables operation of
devices connected with an HDMI (HighDefinition Multimedia Interface) cable by
interlocking each other.
Although this function works for devices
compatible with the Control for HDMI
function, it may not work if connecting
devices other than those manufactured
by Sonv.

## Tips

When connecting a device such as a Blu-ray Disc player to a TV with an HDMI cable enable its Control for HDMI function. To enable the Control for HDMI function o a TV or Blu-ray Disc player, refer to their

# operating instructions. If you enable the Control for HDMI ("BRAVIA" sync) function when using a manufactured by Sony, the Control for HDMI function of the speaker system is also enabled automatically.

# Performing Power Operation or Volume Adjustment by a TV Remote Control

# Power interlocking When you turn on or off the TV, the speaker system will turn on or off

If you turn off the speaker system before turning off the TV, the speaker system may not turn on a turn on a turn on a turn on a turn on the TV next time. In this case, turn on the TV next time, in this case, turn on the TV next time of the sound output device in the TV menu.

When using Sony TV, turn on the speaker system for the sound on.

The TV sound that you are watching is output from the speaker system automatically. You can adjust the speaker system volume by the TV remote control.

## Other Interlocking Function

One-Touch Play Function

wnen you play content on a Blu-ray Disc player or "PlayStation-4," etc. connected to the TV, the speaker system and TV are turned on automatically.

Set [HDMI] - [CONTROL FOR HDMI] to [ON]. The TV must support the Control for HDMI function. For details, refer to the operating instructions of your TV. instructions of your TV.

Check the speaker settings of the TV.
The speaker system power syncs with
the speaker settings of the TV. For
details, refer to the operating
instructions of your TV.
Depending on the TV, if the sound
was output from the speakers of the
TV the previous time, the speaker
system may not turn on by
interlocking with the TV power even
when the TV is turned on.

# If you enable the Control for HDMI ("BRAVIA" sync) function when using a TV manufactured by Sony, the Control for HDMI function of the speaker system is also enabled automatically.

### Changing the Settings

## Using the Setting Menu

You can set the following items with the setting m if you disconnect the AC power cord (mains lead).

Supported Input Audio

Audio formats supported by this speaker system are as follows.

Dolby Digital

BLUETOOTH devices should be used within approximately 10 meters (33 feet) (unobstructed distance) of each other. The effective communication range may become shorter under the following conditions:

er obstruction is between the ices with a BLUETOOTH connec ations where a wireless LAN is

- Around microwave ovens that are in use Locations where other electromagnetic waves occur

\*\*BULETOOTH devices and wireless LAN (IEEE 802.11b/g/n) use the same frequency band (2.4 GHz). When using your BLUETOOTH device near a device with wireless LAN capability, electromagnetic interference may occur. This could result in lower data transfer rates, noise, or inability to connect. If this happens, try the following remedies:

- Use this speaker system at least 10 meters (33 feet) away from the wireless LAN device.

- Turn off the power to the wireless LAN device within 10 meters (33 feet).

- Install this speaker system and BLUETOOTH device as closer to each other as possible.

- The radio waves broadcast by this speaker system may interfere with the operation of some medical devices. Since this interference may result in maffunction, always turn off the power on this speaker system may full-troff the wice in the following locations:

following locations:

In hospitals, on trains, in airplanes, at gas stations, and any place where flammable gasses may be present
