

## Operating Instructions

# Sound Bar

814100250

Please read this manual carefully before operating your unit and retain for future reference.

#### WARNING

The speaker system is not disconnected from the mains as long as it is connected to the AC outlet, even if the speaker system itself has been turned off.

To reduce the risk of fire, do not cover the ventilation opening of the speaker system with newspapers, tablecloths, curtains, etc. Do not expose the speaker system to naked flame sources (for example, lighted candles).

To reduce the risk of fire or electric shock, do not expose this speaker system to dripping or splashing, and do not place objects filled with liquids, such as vases, on the speaker

As the mains plug is used to disconnect the speaker system from the mains, connect the speaker system to an easily accessible AC outlet. Should you notice an abnormality in the speaker system, disconnect the mains plug from the AC outlet immediately.

Do not install the speaker system in a confined space, such as a bookcase or built-in cabinet.

#### CAUTION

Risk of explosion if the battery is replaced by an incorrect type. Do not expose batteries or appliances with battery-installed to excessive heat, such as sunshine and fire

Do not place this product close to

Do not place this product close to medical devices.
This product (including accessories) has magnet(s) which may interfere with pacemakers, programmable shunt valves for hydrocephalus treatment, or other medical devices. Do not place this product close to persons who use such medical devices. Consult your doctor before using this product if you use any such medical device. Indoor use only.

#### For the bar speaker

The nameplate is located on the bottom of the bar speaker.

# Should any solid object or liquid fall into the

snould any soine of object of inqual fail mut of speaker system and have it checked by qualified personnel before operating it any further.
 Do not climb on the speaker system, as you may fall down and injure yourself, or speaker system damage may result.

#### On power sources

**Precautions** 

- Before operating the speaker system, check that the operating voltage is identical to your local power supply. The operating voltage is indicated on the nameplate on the bottom of the bar speaker
- If you are not going to use the speaker system speaker system from the wall outlet (mains). To disconnect the AC power cord (mains lead), grasp the plug itself; never pull the cord.
- One blade of the plug is wider than the other for the purpose of safety and will fit into the wall outlet (mains) only one way. If you are unable to insert the plug fully into the outlet, contact your dealer.
- The AC power cord (mains lead) must be changed only at a qualified service shop.

#### On heat buildup

Although the speaker system heats up during operation, this is not a malfunction. If you continuously use this speaker system at high volume, the speaker system temperature at

the rear and bottom rises considerably. To avoid burning yourself, do not touch the speaker system

#### On placement

- Place the speaker system in a location with adequate ventilation to prevent heat buildup and prolong the life of the speaker system. Do not place the speaker system near heat sources or in a place subject to direct sunlight, excessive dust, or mechanical shock.

  Do not place anything on the top of the bar speaker.
- speaker.

  If the speaker system is being used in combination with a TV, VCR, or tape deck, noise may result and picture quality may suffer. In such a case, place the speaker system away from the TV, VCR, or tape deck.

  Use caution when placing the speaker system on a surface that has been specially treated (with wax, oil, polish, etc.), as staining or discoloration of the surface may result.
- Take care to avoid any possible injury from the corners of the bar speaker.

Before connecting other equipment, be sure to turn off and unplug the speaker system.

# If you encounter color irregularity on a

Color irregularities may be observed on certain types of TV.

If color irregularity is observed... Turn off the TV, then turn it on again after 15 to If color irregularity is observed again.

Place the speaker system further away from the TV.

#### **About These Operating Instructions**

The instructions in these Operating Instructions describe the controls on the remote control.
 Some illustrations are presented as conceptual drawings, and may be different from the actual products
 Characters in brackets [] appear in the front panel display.

**Installation and Connection** 

# Connecting a TV with an HDMI Cable and/or Optical Cable

Mounting the Bar Speaker on a Wall (kit not included)

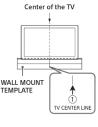

- safety during the installation.

  If using a cable with a large plug, it may not be possible to mount the bar speaker on a wall. Sony shall not be held responsible for accidents or damage caused by improper installation, insufficient wall strength, improper screw installation, natural disasters, etc.
- 1 Prepare two screws (not supplied) that are suitable for the wall mount holes on the rear of the bar speaker.

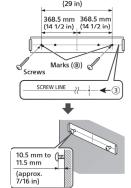

2 Align the vertical line above the "↑ ① TV CENTER LINE" printed on the WALL MOUNT TEMPLATE (supplied) with the center of the

3 Align the "← ③ TV BOTTOM LINE" printed on the WALL MOUNT TEMPLATE with the bottom of your TV, then adhere the WALL MOUNT TEMPLATE on the wall with a commercially available adherity tage, etc.

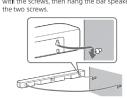

4 Fasten the screws prepared in step 1 securely into the screw marks (®) on the "4- ® SCREW LINE" printed on the WALL MOUNT TEMPLATE.

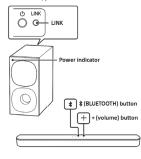

5 Remove the WALL MOUNT TEMPLATE 6 Hang the bar speaker on the screws

Align the holes on the rear of the bar speaker with the screws, then hang the bar speaker on the two screws.

# Connecting the Subwoofer Manually

If you cannot connect the subwoofer to the speaker system, or you use multiple wireless products and want to specify the wireless connection to link the speaker system to the subwoofer, perform the manual connection.

1 Press and hold \$ (BLUETOOTH) and + (volume on the bar speaker for more than 5 seconds. [SECURE LINK] appears, then [LINK] flashes in the front panel display.

To cancel the manual connection, press and hold \$ (BLUETOOTH) and + (volume) on the bar speaker for more than 5 seconds again.

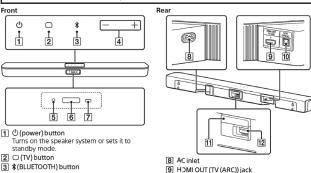

2 Press LINK on the subwoofer The manual connection starts.

The power indicator of the subwoofer flashes

**3** Make sure that [DONE] appears in the front panel display. The manual connection is established and the power indicator of the subwoofer lights in

If [ERROR] appears in the front panel display, the connection of the subwcofer has not been established. Perform the connection again.

Setting	Explanation
[SF.ON]	The sound is output with the surround effect. This setting is suitable for experiencing the surround sound with presence.
[SF.OFF]	The sound is output without the surround effect. This setting is suitable for listening to music or news.

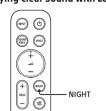

#### **Making Dialogs Clearer (VOICE)**

1 Press VOICE to select the setting.

The setting appears in the front panel display Explanation Dialog is easily heard by [Vo.ON] enhancing dialog range [Vo.OFF Deactivates the voice mode

#### Enjoying Clear Sound with Low Volume at Midnight (NIGHT)

1 Press NIGHT to select the setting. The setting appears in the front panel display. Explanation Setting Sound is output at low volume with minimum loss of fidelity and clarity of dialog. [N.OFF] Deactivates the night mode

function. Note When you turn the speaker system off, this setting is set to [N.OFF] automatically.

# Using the Speaker System by Interlocking with a TV

#### Operating the Speaker System by Interlocking with a TV (Control for HDMI Function)

Connecting a TV compatible with the Control for HDMI function using an HDMI cable enables you to interlock the speaker system operation such as power on/off or volume adjustment with a TV.

About the Control for HDMI function
The Control for HDMI function is a function
that enables operation of devices connected
with an HDMI (High-Definition Multimedia
Interface) cable by interlocking them.
Although this function works for devices
compatible with the Control for HDMI
function, it may not work if connecting
devices other than those manufactured by
Sony

# Preparing to Operate by Interlocking

With a IV
Enable the Control for HDMI function settings
of the TV connected to the speaker system
with an HDMI cable.
The default setting of the Control for HDMI
function of the speaker system is [ON].

When connecting a device such as a Blu-ray
Disc player to a TV with an HDMI cable, enable
its Control for HDMI function.
To enable the Control for HDMI function of a
Ty or Blu-ray Disc player, refer to their operating

instructions.

• If you enable the Control for HDMI ("BRAVIA" sync) function when using a TV manufactured by Sony, the Control for HDMI function of the speaker system is also enabled automatically. When the setting is complete, [DONE] appears in the front panel display.

#### **Performing Power Operation or** Volume Adjustment by a TV Remote Control

en turning the TV on/off or adjusting the volume using the TV emote control, the speaker system power operation or volume adjustment is interlocked.

# (O) (III)

**Power interlocking**When you turn on or off the TV, the speaker system will turn on or off automatically.

system will turn on or on automatically.

Note
If you turn off the speaker system before
turning off the TV, the speaker system may
not turn on automatically even though you
turn on the TV next time. In this case,
perform the following operation.

— Select the speaker system for the sound
output device in
the TV menu.

— When using Sony TV, turn on the speaker
system while the TV is turned on.

Volume adjustment

Volume adjustment
The sound of the TV you are watching is

from the speaker system automatically. You can adjust the speaker system volume

TV remote control. You can change the Control for HDMI settings by following procedure.

1 Press and hold VOICE on the remote control

for more than 5 seconds. [CONTROL FOR HDMI] appears in the front panel

2 Press (volume) +/- on the remote control to display the desired setting in the front panel display.
3 Wait until the displayed setting

disappears from the front panel display. The setting is fixed.

### Operating the Speaker System by Interlocking with a TV Compatible with the "BRAVIA" Sync Function

"BRAVIA" Sync is an extended function developed by Sony based on the Control for HDMI function. By connecting "BRAVIA" Sync-compatible devices such as a TV using an HDMI cable, you can control the devices by interlocking them with each other. To use "BRAVIA" Sync
"BRAVIA" Sync is enabled by enabling the Control for HDMI function of the Sony device. For the
operation to enable the Control for HDMI function, see "Preparing to Operate by Interlocking

What You Can Do with "BRAVIA" Sync Control for HDMI function

**Saving Power Consumption** 

Turning the Speaker System Off by Detecting the Using State When you set the auto standby function to on, the speaker system enters standby mode automatically when you do not operate the speaker system for about 20 minutes and the speaker system is not

eceiving an input signal.

 Press and hold ⊕ (power) and ⊕ (TV) on the bar speaker for more than 5 seconds.
 [AUTO STANDBY] and the current setting appear in the front panel display.
 Press ⊿ (volume) +/- on the remote control to display the desired setting in the front panel display. **3** Wait until the displayed setting disappears from the front panel display. The setting is fixed.

## Saving Power in Standby Mode

To save power consumption during the standby mode, set the BLUETOOTH standby mode and Contro for HDMI function to off. To change the BLUETOOTH standby mode setting, press and hold  $\circlearrowleft$  (power),  $\updownarrow$  (BLUETOOTH), and – (volume) on the bar speaker for more than 5 seconds (the changed setting appears in the front panel display). To change the Control for HDMI function setting, press and hold VOICE on the remote control for more than 5 seconds to display the setting in the front panel display, then press 

(volume) +/- on the remote control to select the desired setting.

 Check the sound output of the TV. Refer to the operating instructions of the TV for the TV

settings.

The speaker system supports the Dolby Digital and PCM audio formats. When you playback ar unsupported format, set the digital audio out setting of the TV (BRAVIA) to "PCM." For details, refer to the operating instructions of your TV.

The sound is output from both the speaker

system and the TV.

Change the audio output setting of the TV so that the TV sound is output from the external speaker.

Set the TV volume to minimum.

#### The output sound of the speaker system is not the same level as that of the TV even though the values of the volume level on the speaker system and TV are set to the same value.

If the Control for HDMI function is set to on, the value of the volume level on the speaker system may appear on your TV as the TV volume. The output sound levels of the speaker system and output sound levels of the speaker system and TV differ even though the values of the volume level on the speaker system and TV are set to the same value. The output sound levels of the speaker system and TV differ depending on the sound processing characteristics of each, and it is not a malfunction.

The surround effect cannot be obtained. Depending on the input signal and the sound field setting, surround sound processing may not work effectively. The surround effect may be

subtle, depending on the program or disc.

To play multi channel audio, check the digital audio output setting on the device connected to the speaker system. For details, refer to the operating instructions of the connected device.

#### Subwoofer

No sound or only very low-level sound is heard from the subwoofer.

Press BASS + on the remote control to increase the subwoofer volume.

Make sure that the power indicator on the subwoofer is lit in green or amber.

 If the power indicator on the subwoofer does not light try the following

Make sure the AC power cord (mains lead) of the subwoofer is connected properly.

- Press (b) (power) of the subwoofer to turn on the power.

If the power indicator on the subwoofer lights in red, try the following.

ed, ty the lowing.

Move the subwoofer to a location near the bal speaker so that the power indicator on the subwoofer lights in green or amber. Follow the steps in "Connecting the Subwoofer Manually."

If the power indicator on the subwoofer flashes in red, press () (power) of the subwoofer to turn

off the power and check whether the ventilation holes of the subwoofer is blocked or not. If the input sources contain very little bass sound components (i.e., a TV broadcast), the sound from the subwoofer may be difficult to hear. Play the built-in demonstration music by following the steps below and check that the sound is

output from the subwoofe OPress and hold ○ (TV) on the bar speaker for 5 seconds.
 The built-in demonstration music is played.

② Press ☐ (TV) again. The built-in demonstration music is canceled and the speaker system returns to TV input.

 Set the night mode to off by pressing NIGHT. BASS +/- does not work and [NOT USE]

 appears in the front panel display.
 BASS +/- does not work when the subwoofer is not connected. Check the power and connection

#### status of the subwoofe **Mobile Device Connection**

**BLUETOOTH** connection cannot be completed.

 Make sure that the BLUETOOTH indicator on the bar speaker is lit. Make sure the BLUETOOTH device to be connected is turned on and the BLUETOOTH

function is enabled. • Bring the BLUETOOTH device close to the bar speaker.

Pair the speaker system and the BLUETOOTH device again. You may need to cancel the pairing with the speaker system using your BLUETOOTH device first.

 If the BLUETOOTH function is set to off, set it to on. To change the BLUETOOTH function setting, press and hold Ø (power) and ★(BLUETOOTH) on the bar speaker for more than 5 seconds (the changed setting appears in the front panel display).

# Pairing cannot be achieved. • Bring the BLUETOOTH device close to the bar

speaker.

• Make sure the speaker system is not receiving interference from a wireless LAN device, other 2.4 GHz wireless devices, or a microwave oven. I a device that generates electromagnetic radiation is nearby, move the device away from

the speaker system Pairing may not be possible if other BLUETOOTH devices are present around the speaker system. In this case, turn off the other BLUETOOTH

devices mobile device is not output from the speaker system.

# Make sure that the BLUETOOTH indicator on the

- does not function.

   Point the remote control at the remote control
- sensor on the bar speaker.
- Remove any obstacles in the path between the remote control and the speaker system.
  Replace both batteries in the remote control
- with new ones, if they are weak. Make sure you are pressing the correct button on the remote control.

## The TV remote control does not work.

 Install the bar speaker so that it does not obstruct the remote control sensor of the TV.

obstruct the remote control sensor of the IV.

This problem might be solved by enabling the IR repeater function. Press and hold

(BLUETOOTH) and – (volume) on the bar speaker for more than 5 seconds to display [IR REPEATER] in the front panel display, then press (volume) +/– on the remote control to display [ON] in the front panel display.

#### Others

# The Control for HDMI function does not

work properly. Check the connection with the speaker system

(refer to the supplied Startup Guide).

Enable the Control for HDMI function on the TV.
For details, refer to the operating instructions of your TV.

 Wait a while, and then try again. If you unplug the speaker system, it will take a while before operations can be made. Wait for 15 seconds or longer, and then try again. Make sure the TV connected to the speaker

system supports the Control for HDMI function.
The type and number of devices that can be controlled by the Control for HDMI function is restricted by the HDMI CEC standard as follows:

- Recording devices (Blu-ray Disc recorder, DVD recorder, etc.): up to 3 devices Playback devices (Blu-ray Disc player, DVD

player, etc.): up to 3 devices Tuner-related devices: up to 4 devices Audio system (receiver/headphone): up to 1

#### device (used by the speaker system) [PROTECT] is scrolled in the front panel lisplay, then the speaker system is turned off after 5 seconds.

The protection feature is activated. Disconnect the AC power cord (mains lead) and make sure that the ventilations of the bar speaker are not covered and turn on the speaker system after a

Sensors of the TV do not work properly. The bar speaker may block some sensors (such as the brightness sensor), the remote control as the originals sensor), the femote control sensor of your TV or the emitter for 3D glasses (infrared transmission) of a 3D TV that supports the infrared 3D glass system, or wireless communication. Move the bar speaker away from the TV within a range that allows those parts to operate properly. For the locations of the sensors and remote control receiver, refer to

#### the operating instructions of the TV. The speaker system does not work

 The speaker system may be in demo mode. To cancel demo mode, reset the speaker system. Press and hold (b) (power) and – (volume) on the bar speaker for more than 5 seconds.

This screen is an example for English

• Select the TV program by using the TV remote

## Resetting the Speaker System

If the speaker system does not operate properly, reset the speaker system as follows. 1 Press and hold () (power) and – (volume) on the bar speaker for more than 5 seconds.

[RESET] appears in the front panel display, and

the settings return to their initial status. 2 Disconnect the AC power cord (mains lead).  ${\bf 3}$  Connect the AC power cord (mains lead), then press  $\circlearrowleft$  (power) to turn on the speaker system.

# Supported Input Audio Formats (HDMI OUT (TV (ARC)) or TV IN (OPTICAL))

Audio formats supported by this speaker system are as follows

 Dolby Digital Linear PCM 2ch

panel display.

On BLUETOOTH Communication BLUETOOTH devices should be used within approximately 10 meters (33 feet) (unobstructed distance) of each other. The effective communication range may become shorter

 When a person, metal object, wall or other obstruction is between the devices with a BLUETOOTH connection Locations where a wireless LAN is installed - Around microwave ovens that are in use

Locations where other electromagnetic waves

under the following conditions.

occur • BLUETOOTH devices and wireless LAN (IEEE 802.11b/g/n) use the same frequency band (2.4 GHz). When using your BLUETOOTH device near a device with wireless LAN capability, electromagnetic interference may occur. This could result in lower data transfer rates, noise, or inability to connect. If this happens, try the following remedies:

 Use this speaker system at least 10 meters (33 feet) away from the wireless LAN device. Turn off the power to the wireless LAN device when using your BLUETOOTH device within 10 meters (33 feet). - Install this speaker system and BLUETOOTH

device as closer to each other as possible • The radio waves broadcast by this speaker system may interfere with the operation of some medical devices. Since this interference may result in malfunction, always turn off the power on this speaker system and BLUETOOTH device in the following locations:

In hospitals, on trains, in airplanes, at gas stations, and any place where flammable gasses may be present

Near automatic doors or fire alarms This speaker system supports security functions that comply with the BLUETOOTH specification to ensure secure connection during communication using BLUETOOTH technology However, this security may be insufficient depending on the setting contents and other factors, so always be careful when performing communication using BLUETOOTH technology Sony cannot be held liable in any way for

damages or other loss resulting from information leaks during communication using BLUETOOTH technology. BLUETOOTH communication is not necessarily

guaranteed with all BLUETOOTH devices that have the same profile as this speaker system. BLUETOOTH devices connected with this speake system must comply with the BLUETOOTH specification prescribed by the Bluetooth SIG, Inc., and must be certified to comply. However even when a device complies with the BLUETOOTH specification, there may be cases

where the characteristics or specifications of the

BLUETOOTH device make it impossible to

connect, or may result in different control methods, display or operation.

 Noise may occur or the audio may cut off depending on the BLUETOOTH device connected with this speaker system, the communications environment, or surrounding conditions

If you have any questions or problems concerning your speaker system, contact a service center
