IMPORTANT SAFEGUARDS

READ ALL INSTRUCTIONS BEFORE USE • HOUSEHOLD USE ONLY

Read all instructions before using your NINJA DUALBREW PRO COFFEE SYSTEM

When using electrical appliances, basic safety precautions should always be followed, including the following:

⚠ WARNING

To reduce the risk of fire, electric shock, serious injury, death, or damage when using this appliance, follow these basic safety precautions.

General Precautions

- To eliminate a choking hazard for young children, discard all packaging materials immediately upon unpacking.
- This appliance can be used by persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.
- To reduce the risk of electric shock, this appliance has a polarized plug (one blade is wider than the other). As a safety feature, this plug will fit into a polarized outlet only one way. If the plug does not fit fully into the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. **DO NOT** force into outlet or try to modify to fit.
- Keep the appliance and its cord out of reach of children. **DO NOT** allow the appliance to play or be used by children. Close supervision is necessary when used near children.
- To protect against fire, electric shock, and injury to persons, **DO NOT** immerse cord, plugs, or body of machine in water or other liquid.
- NEVER** carry the appliance by the power cord or pull it to disconnect from electrical socket; instead grasp the plug and pull to disconnect.
- DO NOT** operate any appliance with a damaged cord or plug, or after the appliance malfunctions, or has been dropped or damaged in any manner. Contact a Service Center.

- For household and countertop use only. **DO NOT** let the power cord hang over the edge or touch hot surfaces such as the stove.
- NEVER** use socket below counter.
- To avoid risk of fire, electrical shock, or damage to the brewer, **DO NOT** use brewer in an appliance garage or under a wall cabinet.
- To disconnect when not in use and before cleaning, turn off and then unplug from outlet.
- Turn off and allow to cool before putting on or taking off parts, and before cleaning the appliance.

Operating Notice

- The use of an accessory not recommended by the manufacturer may create an overflow condition and scalding hazard, or result in fire, electric shock, or personal injury.
- ALWAYS** use appliance on a clean, dry, level surface.
- DO NOT** place on or near a hot gas or electric burner or in a heated oven.
- DO NOT** use this appliance for anything other than its intended use.
- DO NOT** use outdoors.
- DO NOT** touch hot surfaces. Use handles or knobs.
- To avoid contact with steam and hot surfaces, **DO NOT** reach across top of brewer to froth.
- ALWAYS** place a vessel, carafe or cup beneath the brew basket to receive the brewed coffee.

-  Indicates to read and review instructions to understand operation and use of product.
-  Indicates the presence of a hazard that can cause personal injury, death or substantial property damage if the warning included with this symbol is ignored.
-  Take care to avoid contact with hot surface. Always use hand protection to avoid burns.
-  For indoor and household use only.

PARTS

- A** Brewer (Power cord not shown)
B 60 oz. Removable Water Reservoir
C Removable Water Reservoir Lid
D Sliding Lid
E Hinged Hood
F Configurable Water Reservoir Base
G Single-Serve Cup Platform
H Control Panel
I Brew Basket
J Hot Water Dial (Not available on all models)

- K** Ninja® Pod Adapter
L Frother Whisk
M Brew-Through Lid
N Ninja Glass Carafe (Not available on all models)
O Intelligent Warming Plate (Not available on all models)
P Ninja Thermal Carafe (Not available on all models)
Q Drip Stop

NOTE: Accessories may vary depending on the model.

Refer to quick guide, if available.

The images shown here are for illustrative purposes only and may be subject to change.

TECHNICAL SPECIFICATIONS

Voltage: 120V~, 60Hz

USING THE CONTROL PANEL

Not all functions are available on all models.

The actual descriptions of control panel and their locations may vary, depending on the model.

SMART SENSING MODE INDICATORS

MODE INDICATORS	STATE
  	Grounds: The Sliding Lid is slid all the way forward over the brew basket until it is completely closed and the brewer is ready to brew grounds.
  	Pods: The Ninja® Pod Adapter is inserted, locked, and shut, and the brewer is ready to brew pods.
  	Water: The dial on the left side of the brewer is turned to the water droplet icon, and the brewer is ready to dispense hot water (not available on all models).
  	No State: One of the above criteria has not been met.

PREPARING FOR USE

SETTING THE CLOCK

- When the brewer is first plugged in, HR/MIN will illuminate to indicate that the time has not been set.
- Press the HR/MIN button to set the clock.
- Use the Multi-Serve Dial to select the correct hour. Then, press the START BREW button to toggle to minutes.
- Use the dial again to select the correct minute, and press the START BREW button to set the clock at the displayed time.

NOTE: At any time, you can set the clock by turning on the brewer, pressing the HR/MIN button, and following steps 3–4.

NOTE: If you unplug the brewer or in the event of a power loss, you will need to reset the clock the next time the brewer is plugged in.

HIGH-ALTITUDE CALIBRATION BREW

Required for users in high-altitude areas. Not running the high-altitude calibration brew in a high-altitude area will result in excessive steaming during brewing.

Because water boils at a lower temperature at higher altitudes, running a calibration cycle before your first brew allows the brewer to detect the boiling point of water at your location. Running a calibration cycle will help deliver a consistent brew each time.

- Fill the water reservoir up to, but not exceeding, the Full line.
- Insert the brew basket and slide the sliding lid closed, then place an empty carafe on the base.
- Press and hold both BREW STYLE and HR/MIN until you hear a confirmation sound.
- A calibration cycle will begin, and the display will count down until the Altitude calibration is complete. When complete, the brewer will beep and display “End” on the dial. Discard the water in the carafe.

NOTE: This calibration is permanently saved and will not be lost if power is lost or brewer is unplugged. Brewer can be recalibrated at any time if the altitude where it is being used changes.

PRIMING YOUR NINJA® DUALBREW PRO COFFEE SYSTEM

- Clean all accessories before your first brew.
- Plug the brewer in and turn it on by pressing the power button.
- Lift the water reservoir off of its base. Remove the reservoir lid. Add water up to, but not exceeding the Full line. Return the water reservoir to the brewer. **DO NOT** fill the water reservoir with anything other than water, as other liquids may damage your brewer.

NOTE: We recommend using cool or room temperature water in the reservoir. **DO NOT** fill with hot or boiling water.

- Remove the Ninja Pod Adapter by pushing the handle away from you so that the position indicator is in the REMOVE position. Then, using the handles on the left and right, lift the adapter out of the brewer.

- After the adapter is removed, slide the sliding lid all the way forward over the brew basket until it is completely closed and clicks into place.

NOTE: DO NOT place ground coffee directly in the brew basket without a filter.

- Center the carafe with the brew-through lid installed below the brew basket. With everything securely in place and the brewer powered on, turn the dial to select the Full Carafe size and press the BREW STYLE button to select Classic.

- To start, press the START BREW button. When the cycle is complete, discard the water and rinse the carafe. You are now ready to use your Ninja DualBrew Pro Coffee System.

- Delay Brew Button
- Water Temperature Button
- Keep Warm Indicator
- Keep Warm Button (Orange)
- Programmable Digital Clock and Ounce Display
- Power Button
- Drip Stop Indicator
- Smart Sensing Mode Indicators
- Multi-Serve Dial and Start/Stop Button
- Brew Style Button
- Intelligent Clean Cycle Indicator (Orange)
- Intelligent Clean Cycle Button
- Hour/Minute Button

USING THE NINJA® DUALBREW PRO COFFEE SYSTEM – CONT.

BREW VOLUMES AND MEASUREMENTS

Each size and brew style produces a different amount of coffee to optimize strength and flavor.

NOTE: The coffee grounds will absorb some of the water that is brewed; this will cause slight variability in brew volumes.

NOTE: Brew volumes may be slightly larger or smaller than what is stated due to various factors in the system.

APPROXIMATE BREW VOLUMES

GROUNDS			
Size	Classic	Rich	Over Ice (filled with ice)
Sm Cup	8 oz.	7 oz.	8 oz.
Cup	10 oz.	8oz.	10 oz.
XL Cup	12 oz.	10 oz.	12 oz.
Travel	15 oz.	12 oz.	14 oz.
XL Travel	18 oz.	16 oz.	18 oz.
¼ Carafe	28 oz.	26 oz.	28 oz.
½ Carafe	37 oz.	33 oz.	35 oz.
¾ Carafe	46 oz.	41 oz.	45 oz.
Full Carafe	55 oz.	47 oz.	55 oz.

NOTE: There may be some water left in the reservoir after your brew. This is normal to keep the brewer from running out of water.

PODS			
Size	Classic	Rich	Over Ice (filled with ice)
6 oz.	6 oz.	6 oz.	6 oz.
8 oz.	8 oz.	8 oz.	8 oz.
10 oz.	10 oz.	9 oz.	10 oz.
12 oz.	12 oz.	11 oz.	12 oz.

NOTE: You do not need to adjust the size for Specialty Brew—it always yields approximately 4 oz.

NOTE: Adjust to your preferred taste. More scoops result in stronger coffee but slightly lower volumes, fewer scoops result in weaker coffee and slightly higher volumes. Use fewer scoops of decaffeinated coffee to prevent overflow. Use a medium-sized grind if grinding whole beans. Grinding beans too finely may cause the brew basket to overflow.

COFFEE MEASUREMENT CHART	
Serving Size	Tablespoons
Sm Cup	2-3 tablespoons
Cup	
XL Cup	3-5 tablespoons
Travel	
XL Travel	6-10 tablespoons
¼ Carafe	
½ Carafe	8-14 tablespoons
¾ Carafe	
Full Carafe	4 tablespoons
Specialty (4 oz.)	

BREWING GROUND COFFEE USING THE BREW BASKET AND SLIDING LID

- To prepare for brewing, open the sliding lid by sliding it back under the hood and ensure the brew basket is installed.

- Place a #4 paper cone filter (not supplied) or permanent filter(not included) on all models, sold separately in the brew basket.

NOTE: Fold the paper filter along the seams, open the top fully, and firmly press it into the brew basket, making sure it is fully seated.

- Use a Scoop™ and follow the measurements on the scoop or on the Coffee Measurement Chart to fill the filter.

- Return the sliding lid to its closed position by sliding it forwards over the brew basket until it clicks into place.

The images shown here are for illustrative purposes only and may be subject to change.

BREWING PODS

USING THE NINJA POD ADAPTER

- To prepare for brewing, open the sliding lid by sliding it back under the hood, and ensure the brew basket is installed.

NOTE: The Ninja Pod Adapter comes already installed in the brewer.

- Ensure the adapter is in the REMOVE position before installing. Then place the adapter over the brew basket and push down firmly so it is fully seated.

NOTE: Make sure the brew basket is clean and free of any filters before inserting the Ninja® Pod Adapter.

- Slide the Ninja Pod Adapter handle into the LOCK position.

- Lift the the Ninja Pod Adapter handle to reveal the pod holder. Place a new pod in the holder.

- Press the handle down firmly to pierce the pod, and ensure that it is completely closed. There will be an audible click and some resistance when closing the handle as the needles puncture the pod.

NOTE: DO NOT remove the top of the K-Cup Pod.

HIGH-ALTITUDE BREWING: Before closing the Ninja Pod Adapter handle to start a brew, Using your fingers, carefully apply pressure on the K-Cup Pod until the bottom of the K-Cup Pod is punctured by the exit needle, and the pod is fully seated in the pod holder. This releases excessive gas built up from the high altitude and prevents pod blowout.

NOTE: Reusable K-Cup Coffee Filters are not compatible with the Ninja Pod Adapter. If using ground coffee, use the grounds mode with a paper or permanent filter (not included), to brew a single-serve size.

BREW STYLES

CLASSIC BREW & RICH BREW

- Use the Multi-Serve dial to select the brew size. Place the empty vessel under the brew basket.

NOTE: If making a single cup, lower the Single-Serve Cup Platform and set your vessel in the center of it to help prevent splashing. This applies to all brew styles.

- Press the BREW STYLE button to choose either Classic Brew or Rich Brew.

- Press the START BREW button on the dial to start the brew. To cancel the brew at any time, press the START BREW button on the dial again or press the Power button.

NOTE: The brewing cycle will begin, then pause for a short period before resuming. This process is used to evenly saturate the coffee grounds. This applies to all brew styles.

- The brewer will beep to signal the brew has started. The progress bar around the dial will illuminate to indicate the status of the brew. When the brew is finished, the machine will beep again and End will appear on the display.

NOTE: Rich Brew will use slightly less water and yield slightly less brewed coffee than Classic Brew. See Approximate Brew Volume chart for additional information.

OVER ICE BREW

- Fill your desired vessel to the top with ice cubes and place the vessel below the brew basket. Use the Multi-Serve dial to select the brew size.

NOTE: DO NOT add ice to the water reservoir.

- Press the BREW STYLE button to choose Over Ice Brew.

- Press the START BREW button on the dial to start the brew. To cancel the brew at any time, press the START BREW button on the dial again or press the Power button.

- The brewer will beep to signal the brew has started. The progress bar around the dial will illuminate to indicate the status of the brew. When the brew is finished, the machine will beep again and End will appear on the display.
